INSTALLER MILES FOR HOMEOWNERS GL-EVIQ07WRS

Firstly, you will need to download the **Installer Miles** app onto your phone from your chosen app store.

Make sure the charger has got power going to it, you will be able to tell as the EVIQ Logo on the front of the charger will be lit up blue. If not ensure the unit has been turned on at your consumer unit, if it has been turned on at the consumer unit and still not lighting up, we recommend getting in touch with the installer.

Open **Installer Miles** and select **Access for Electric Miles Drivers**

On the **Welcome!** page select the **Charger Connectivity** option.

Select **EVIQ -> GL-EVIQ07WRS**

To enter the **Serial Number**, scan the QR Code on the side of the charger or enter the serial number next to the QR Code.

Select Network Setup iPhone

- If connecting to Wi-Fi Router of house wirelessly turn the toggle on and enter the Wi-Fi name and password.
- If connecting to the Wi-Fi via LAN please toggle this option on, but do not plug the cable in yet until commissioning is completed.

Select Network Setup Android

- If connecting to Wi-Fi router of the house wirelessly turn the toggle on, then select set up.
- Select the **other** option and enter your Wi-Fi details manually and save.

Go to native settings and make sure everything has been **enabled.**

Under **Network Setup**, there will be a green box with Wi-Fi in to show it has connected.

Select the **Next** option at the bottom of the screen.

When asked to connect the charger via Bluetooth, select **Connect**. Find your EV Charger's Serial Number on the list of available options, tap on it, and enter the password **123456** to connect to it.

Go Back onto **Installer Miles** then select continue, then **Join.**

After a few minutes, the page should go green, and the charger installation/commission is complete.
